VR-1B

**Universal Visual
Indicator**

February 5, 2018

Provide Line Status and Message Waiting Indication

phone and you are not to be disturbed. The **VR-1B** installs in the handset/headset jack using an included "T" adapter.

When used with an analog phone line, the **VR-1B** will provide "ring" indication, "on the phone" indication and "message waiting" indication for both "stutter dial tone" and standard message waiting voltage. In this application the **VR-1B** connects directly to tip and ring.

When used with electronic or digital phones, the **VR-1B** won't have you guessing which phone is ringing in busy offices. The flashing LED can be seen up to 100 feet away. The **VR-1B** connects directly to the electronic phone's speaker.

When used with a headset, you can end those nagging interruptions that occur when associates' don't realize you are on the phone because you are using a headset. The **VR-1B** will flash on and off indicating to everyone that you are on the

Features

- Indicates "ringing", "on-the-phone" or "message waiting"
- LED visible up to 100 ft (30m)
- Power supply included
- **Attractive new compact package**
- **Connects with a modular cord**
- Special "T" adapter provided for handset applications
- **Easy to install**
- **Six different modes of operation for enabling and disabling certain features (DIP switch selectable)**
- Wall mount housing: (2) #6x3/4 panhead screws included

Applications

- Households
- Call centers
- Telemarketing
- Product support groups
- Office cubicles
- CO based voice messaging
- Purchasing departments
- Sales offices

Specifications

Power: 120VAC / 12VDC 500mA, UL listed adapter provided
Dimensions: 3.0" x 4.4" x 1.4" (76mm x 112mm x 36mm)
Shipping Weight: 1.5 lbs (0.68 kg)
Environmental: 32°F to 90°F (0°C to 32°C) with 5% to 95% non-condensing humidity
Light: 0.75" (19mm) red LED
Visibility: 100 ft (30m) typical
Message Waiting Voltage: 90V - 125V
Connections: (1) RJ11 jack, (4) cage clamp screw terminals

Phone: 715-386-8861

IF YOU HAVE A PROBLEM WITH A VIKING PRODUCT, PLEASE CONTACT: VIKING TECHNICAL SUPPORT AT (715) 386-8666

Our Technical Support Department is available for assistance Monday through Friday 8am - 5pm central time. So that we can give you better service, before you call please:

1. Know the model number, the serial number and what software version you have (see serial label).
2. Have your Technical Practice in front of you.
3. It is best if you are on site.

RETURNING PRODUCT FOR REPAIR

The following procedure is for equipment that needs repair:

1. Customer must contact Viking's Technical Support Department at 715-386-8666 to obtain a Return Authorization (RA) number. The customer MUST have a complete description of the problem, with all pertinent information regarding the defect, such as options set, conditions, symptoms, methods to duplicate problem, frequency of failure, etc.
2. Packing: Return equipment in original box or in proper packing so that damage will not occur while in transit. Static sensitive equipment such as a circuit board should be in an anti-static bag, sandwiched between foam and individually boxed. All equipment should be wrapped to avoid packing material lodging in or sticking to the equipment. Include ALL parts of the equipment. C.O.D. or freight collect shipments cannot be accepted. Ship cartons prepaid to: **Viking Electronics, 1531 Industrial Street, Hudson, WI 54016**
3. Return shipping address: Be sure to include your return shipping address inside the box. We cannot ship to a PO Box.
4. RA number on carton: In large printing, write the R.A. number on the outside of each carton being returned.

RETURNING PRODUCT FOR EXCHANGE

The following procedure is for equipment that has failed out-of-box (within 10 days of purchase):

1. Customer must contact Viking's Technical Support at 715-386-8666 to determine possible causes for the problem. The customer MUST be able to step through recommended tests for diagnosis.
2. If the Technical Support Product Specialist determines that the equipment is defective based on the customer's input and troubleshooting, a Return Authorization (R.A.) number will be issued. This number is valid for fourteen (14) calendar days from the date of issue.
3. After obtaining the R.A. number, return the approved equipment to your distributor, referencing the R.A. number. Your distributor will then replace the product over the counter at no charge. The distributor will then return the product to Viking using the same R.A. number.
4. **The distributor will NOT exchange this product without first obtaining the R.A. number from you. If you haven't followed the steps listed in 1, 2 and 3, be aware that you will have to pay a restocking charge.**

TWO YEAR LIMITED WARRANTY

Viking warrants its products to be free from defects in the workmanship or materials, under normal use and service, for a period of two years from the date of purchase from any authorized Viking distributor. If at any time during the warranty period, the product is deemed defective or malfunctions, return the product to Viking Electronics, Inc., 1531 Industrial Street, Hudson, WI., 54016. Customer must contact Viking's Technical Support Department at 715-386-8666 to obtain a Return Authorization (R.A.) number.

This warranty does not cover any damage to the product due to lightning, over voltage, under voltage, accident, misuse, abuse, negligence or any damage caused by use of the product by the purchaser or others. This warranty does not cover non-EWP products that have been exposed to wet or corrosive environments. This warranty does not cover stainless steel surfaces that have not been properly maintained.

NO OTHER WARRANTIES, VIKING MAKES NO WARRANTIES RELATING TO ITS PRODUCTS OTHER THAN AS DESCRIBED ABOVE AND DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

EXCLUSION OF CONSEQUENTIAL DAMAGES: VIKING SHALL NOT, UNDER ANY CIRCUMSTANCES, BE LIABLE TO PURCHASER, OR ANY OTHER PARTY, FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL OR EXEMPLARY DAMAGES ARISING OUT OF OR RELATED TO THE SALE OR USE OF THE PRODUCT SOLD HEREUNDER.

EXCLUSIVE REMEDY AND LIMITATION OF LIABILITY: WHETHER IN AN ACTION BASED ON CONTRACT, TORT (INCLUDING NEGLIGENCE OR STRICT LIABILITY) OR ANY OTHER LEGAL THEORY, ANY LIABILITY OF VIKING SHALL BE LIMITED TO REPAIR OR REPLACEMENT OF THE PRODUCT, OR AT VIKING'S OPTION, REFUND OF THE PURCHASE PRICE AS THE EXCLUSIVE REMEDY AND ANY LIABILITY OF VIKING SHALL BE SO LIMITED.

IT IS EXPRESSLY UNDERSTOOD AND AGREED THAT EACH AND EVERY PROVISION OF THIS AGREEMENT WHICH PROVIDES FOR DISCLAIMER OF WARRANTIES, EXCLUSION OF CONSEQUENTIAL DAMAGES, AND EXCLUSIVE REMEDY AND LIMITATION OF LIABILITY, ARE SEVERABLE FROM ANY OTHER PROVISION AND EACH PROVISION IS A SEPARABLE AND INDEPENDENT ELEMENT OF RISK ALLOCATION AND IS INTENDED TO BE ENFORCED AS SUCH.

FCC REQUIREMENTS

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the side of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive REN's on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of the REN's should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total REN's, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., .03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

The plug used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this VR-1B does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

If the VR-1B causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make

the necessary modifications to maintain uninterrupted service.

If trouble is experienced with the VR-1B, for repair or warranty information, please contact:

Viking Electronics, Inc., 1531 Industrial Street, Hudson, WI 54016 (715) 386-8666

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to Party Line Service is subject to State Tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

WHEN PROGRAMMING EMERGENCY NUMBERS AND (OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:

Remain on the line and briefly explain to the dispatcher the reason for the call. Perform such activities in the off-peak hours, such as early morning or late evenings.

It is recommended that the customer install an AC surge arrester in the AC outlet to which this device is connected. This is to avoid damaging the equipment caused by local lightning strikes and other electrical surges.

PART 15 LIMITATIONS

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Installation

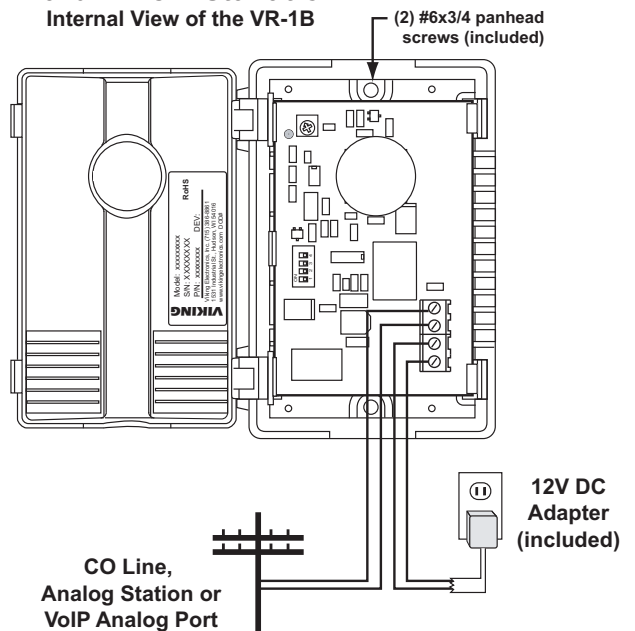

Modular Installation

Internal View of the VR-1B

Hard Wire Installation

Internal View of the VR-1B

IMPORTANT: Electronic devices are susceptible to lightning and power station electrical surges from both the AC outlet and the telephone line. It is recommended that a surge protector be installed to protect against such surges. Contact Panamax at (800) 472-5555 or Electronic Specialists Inc. at (800) 225-4876.

Applications

A. Analog Phones

Connect an analog phone line modular cord into the **VR-1B**'s "LINE IN" jack (or hardwire tip and ring to the screw terminals). Plug the 12V DC power supply into the **VR-1B**'s "12VDC" jack (or hardwire to the screw terminals). The **VR-1B** will flash to indicate ringing, light steady when the phone is off hook, follow the cadence of 90 to 125V message waiting voltage, and gives a "stutter" flash if message waiting "stutter" dial tone is detected. The 4 position DIP Switch can be used to enable / disable different features as shown below. An optional "T" adapter can be used for the **VR-1B** to share the modular plug with a phone.

Switch 1	Switch 2	Description
OFF	OFF	Normal Mode (factory setting): The VR-1B functions as described above.
ON	OFF	Both ring detect and 90 to 125V message waiting voltage detect are disabled.
OFF	ON	Off hook detect is disabled.
ON	ON	PBX Stutter Dial Tone Detect Only Mode: Interrogates idle line for stutter dial tone every 30 seconds.

Switch	Position	Description
3	ON	Always-On Mode enabled: Whenever power is applied to the VR-1B the red LED will illuminate.
3	OFF	Normal Mode (factory setting).

Switch	Position	Description
4	ON	Disable stutter dial tone detect. The VR-1B will never interrogate the line for stutter dial tone.
4	OFF	Stutter dial tone detection functions normally (factory setting).

B. Headsets

Connect the receive pair (typically the inside pair) of an Electronic or Digital phone handset jack, using the special "T" adapter provided, to the "LINE IN" jack (or hardwire to the screw terminals), of the **VR-1B**. Plug the 12V DC power supply into the **VR-1B**'s "12VDC" jack (or hardwire to the screw terminals). When audio going to the handset or headset is detected, the **VR-1B** will flash to show others that you are on the phone.

C. Electronic and Digital Phones

Connect the speaker leads of an Electronic or Digital phone to the "LINE IN" jack (or hardwire to the screw terminals) of the **VR-1B** as shown below. Plug the 12V DC power supply into the **VR-1B**'s "12VDC" jack (or hardwire to the screw terminals). The speaker may be disconnected if a resistor of equal value is substituted. The **VR-1B** will flash to indicate ringing.
