

## KEEPING YOU CONNECTED & PROTECTED

## WITH THESE **MUST-HAVE PRODUCTS!**

### THE CLASSIC CALL BOX

#### LOOKING FOR MORE FEATURES?

- For outdoor use, see E-30-EWP with Enhanced Weather Protection
- For a built-in IP color video camera, check out the new X-35 Series
- For VoIP, see the E-30-IP

Model E-30 is a classic stainless steel speaker phone that provides convenient handsfree communication and can be connected directly to a CO line, analog PABX station, or FXS port. The E-30 is telephone line powered and features a built-in 5 number dialer, as well as intelligent call progress detection for automatic hang-up on CPC, silence, busy signal, or time out.

The timeless brushed stainless steel faceplate is an attractive choice for both residential and commercial applications, and is also rugged and reliable, constructed for many years of use. The E-30 easily flush mounts, or can be surface mounted using a VE-5x5, sold separately.

# THE RELIABLE EMERGENCY PHONE

## ALSO AVAILABLE:

- Additional colors and styles
- SIP compliant VoIP models
- Enhanced Weather Protection for installing outdoors

Scan for  
more info

A straightforward emergency phone, the E-1600A is durable, low-profile, and meets the ADA requirements for elevator and emergency telephones. The phone can dial up to 5 emergency numbers, as well as 2 central station numbers, and is easily programmed from a touch tone phone.

The E-1600A can automatically deliver a digital announcement to identify the location of the emergency call and/or send a DTMF touch tone code. It is phone line powered, requiring no batteries or external power, and is compatible with common Central Station Monitoring equipment.

# THE EFFICIENT PAGING SYSTEM

The PA-2A provides 2 Watts of power - enough to drive three 8-Ohm speakers. Connect the PA-2A to a paging port or unused telephone line input (FXO port) of nearly any phone system for paging.

The PA-2A will also generate adjustable loud ringing from up to 6 analog FXS lines or from a dry contact closure. An external "night transfer" switch can be added to turn loud ringing on or off in night bell applications.

The PA-2A eliminates the installation of multiple bells, relays, and paging cards.

more info

## CHOOSE ONE OF FOUR RINGING SOUNDS:

- Electronic warble (traditional loud ringer)
- Double gong (two identical "gong" tones)
- Quadruple chime (four descending chime tones)
- Door chime (ding-dong)

## TRIVIA QUESTION

Wisconsin produces more of what dairy product than any other state?

Everyone who submits the correct answer by 2/28/2026 will be entered into a prize drawing.

NOV-DEC TRIVIA: What is the largest freshwater lake in the USA? ANSWER: Lake Superior

Congratulations to **SANDRA GANUES** from **GRAYBAR**!

# THE VERSATILE CONTROLLER

The SRC-1 enables a standard touch tone phone to securely operate a set of timed relay contacts to control a doorstrike or gate controller at a remote location. The SRC-1 is fully user programmable and uses non-volatile memory. The SRC-1 eliminates the possibility of dialing the activation code through the entry phone using a hand held touch tone dialer.

The SRC-1 features a switchable 32V talk battery to allow use with any of Viking's analog entry phones (E Series), doorboxes (W Series) or hot-line/panel phones (K Series). The SRC-1 is installed between the entry phone and the secure phone, and will reject touch tones from the entry phone and only operate the relay if the correct activation code (user programmable) is given from the secure phone.

The SRC-1 also provides up to 32 keyless entry codes to operate the relay from the entry phone with 1 to 6 digits. This feature can be disabled in programming for increased security.

## SECURE CONTROL OF:

- High security building entry systems
- Door strikes and gates when used with:
  - Doorboxes: W-1000, W-2000A, W-3000, etc.
  - Entry Phones: E-10A, E-20B, E-30, E-40, etc.
  - Hot Line / Panel Phones: K-1500-7, K-1900-7, K-1900-8, etc.

# THANK YOU for choosing **VIKING**

Since 1969, we've been proudly designing, building, and supporting communication and security solutions right here in Hudson, Wisconsin. Keeping our manufacturing local lets us maintain tight quality control, respond quickly to customer needs, and continue the tradition of solid, dependable craftsmanship that's been part of Viking from the beginning.

Choosing products **MADE IN THE USA** isn't just about where something comes from - it's about knowing it's built with care, durability, and pride. Every piece of equipment that leaves our doors reflects the hard work and dedication of the people who make it, and we're grateful for the chance to keep building products our customers can count on.

Most of all, we want to say **THANK YOU** to our customers. Whether you've been with us for decades or are just discovering Viking, your trust means everything to us. Your support helps keep high-quality American manufacturing going strong, and we're truly grateful for you.

Thanks again for choosing Viking Electronics and for believing in American-made quality. We look forward to continuing to serve you with the reliable, innovative products you've counted on for more than 50 years.
