

SPOTLIGHT: CUSTOMER FAVORITES

CALL BOX

Model E-30 is a classic stainless steel speaker phone that provides convenient handsfree communication and can be connected directly to a CO line, analog PABX station, or FXS port. The E-30 is telephone line powered and features a built-in 5 number dialer, as well as intelligent call progress detection for automatic hang-up on CPC, silence, busy signal, or time out.

The timeless brushed stainless steel faceplate is an attractive choice for both residential and commercial applications, and is also rugged and reliable, constructed for many years of use. The E-30 easily flush mounts, or can be surface mounted using a VE-5x5, sold separately.

- For a built-in color video camera, check out the new X-35 Series
- For VoIP applications, see the E-30-IP

Viking products are **MADE IN THE USA** just as they have been for more than 55 years!

In fact, Viking products are **DESIGNED, MANUFACTURED, and SUPPORTED** right here in Hudson, Wisconsin!

Utilizing **CURRENT TECHNOLOGY**, we design products that give our customers **RELIABLE QUALITY** at **AFFORDABLE PRICES.**

EMERGENCY PHONE

A straightforward emergency phone, the E-1600A meets the ADA requirements for elevator and emergency telephones. It can dial up to 5 emergency numbers, as well as 2 central station numbers, and is easily programmed from a touch tone phone.

The E-1600A can automatically deliver a digital announcement to identify the location of the emergency call and/or send a DTMF touch tone code. It is phone line powered, requiring no batteries or external power, and is compatible with common Central Station Monitoring equipment.

ALSO AVAILABLE:

- Additional colors and styles
- SIP compliant VoIP models
- Enhanced Weather Protection for installing outdoors

MORE CUSTOMER FAVORITES

PAGING SYSTEM

The PA-2A provides 2 Watts of power - enough to drive three 8-Ohm speakers. Connect the PA-2A to a paging port or unused telephone line input (FXO port) of nearly any phone system for paging.

The PA-2A will also generate adjustable loud ringing from up to 6 analog FXS lines or from a dry contact closure. An external "night transfer" switch can be added to turn loud ringing on or off in night bell applications.

The PA-2A eliminates the installation of multiple bells, relays, and paging cards.

Scan for
more info

- 2 Watts of paging power
- Includes one Viking 25AE paging horn
- Can provide background music from an external source
- Provide loud ringing or night bell from 1-6 lines for warehouses, yards, etc.
- Output for controlling a 12 Volt relay from 1-6 ringing lines
- 600 Ohm output for connecting amplifiers

CHOOSE ONE OF FOUR RINGING SOUNDS:

- Electronic warble (traditional loud ringer)
- Double gong (two identical "gong" tones)
- Quadruple chime (four descending chime tones)
- Door chime (ding-dong)

DOOR CONTROLLER

The SRC-1 enables a standard touch tone phone to securely operate a set of timed relay contacts to control a doorstrike or gate controller at a remote location. The SRC-1 is fully user programmable and uses non-volatile memory. The SRC-1 eliminates the possibility of dialing the activation code through the entry phone using a hand held touch tone dialer.

The SRC-1 features a switchable 32V talk battery to allow use with any of Viking's analog entry phones (E Series), doorboxes (W Series) or hot-line/panel phones (K Series). The SRC-1 is installed between the entry phone and the secure phone, and will reject touch tones from the entry phone and only operate the relay if the correct activation code (user programmable) is given from the secure phone.

The SRC-1 also provides up to 32 keyless entry codes to operate the relay from the entry phone with 1 to 6 digits. This feature can be disabled in programming for increased security.

Scan for
more info

- 6 digit programmable security code
- Programmable relay activation time and relay activation code
- Operates on any 12-24V AC/DC power source
- Programmable allow / restrict for dialing from entry phone
- Programmable allow / restrict for keyless entry from entry phone
- 32 keyless entry codes
- Trigger input for contact closure from postal lock, request to exit, etc.

SECURE CONTROL OF:

- High security building entry systems
- Door strikes and gates when used with:
 - Doorboxes: W-1000, W-2000A, W-3000, etc.
 - Entry Phones: E-10A, E-20B, E-30, E-40, etc.
 - Hot Line / Panel Phones: K-1500-7, K-1900-7, K-1900-8, etc.

Control Relay Contacts Across a LAN

The RC-4A Network Enabled Relay Controller provides networked control of four relays via an easy-to-use web interface. The same interface can be used to check the status of four contact closure inputs. Relays can be toggled on or off, or activated for a length of time.

The RC-4A can be configured to work as a remote relay for Viking VoIP series phones, controlling door strikes and gates when a remote relay is required for security reasons. It can also be programmed to send an email or text message in response to a change in one or more of the sensor inputs.

SEE the RC-4A in ACTION!
